

BMW Sewell

Site Location: Site Location: Bishops Stortford
Contract Value: £210,000

Interior Options was chosen to undertake the full refurbishment and expansion plans of the County's main BMW dealership Sewell.

The scope of the work included the offices, showroom, specialist workshop, and car storage areas to provide the operational standards required by BMW.

A specialist mezzanine floor was designed to store up to 45 cars and a bespoke ramp was constructed to facilitate easy access to the floor. Beneath the floor car valeting bays and specialist finishing areas were installed.

The project involved detailed liaison with the local planning authorities and careful coordination of the specialist trades and nominated sub-contractors.

Despite continual changes in specification and scope of works the project was completed on time and to budget with minimal disruption to Sewell's clients.

"Throughout the project the team proved more than capable of handling every stage in a very professional manner, allowing us to continue to provide the expected high level of service to our customers throughout a potentially disruptive period "

Brian Bancroft
Managing Director
Sewell BMW
