

## Jarvis Group Ltd

Site Location: Harpenden, Hertfordshire

Contract Value: £60,000

Jarvis have designed and built their own new improved leading edge head office building located on the picturesque riverbank in Harpenden. The new, landmark site not only resonates modernity but also compliments the surroundings with subtle use of faceted curves of reflective glass.

They have moved from their old offices of 12,000 sq. ft. and now have developed into two floors in the new of 14,000 sq. ft.

The staff has reported the improved environment has helped enhance moral and synergies between departments.

Jarvis chose a distinct panelled and glazed elevation partition with white painted aluminium framework. This was achieved with the Komfort 600 Series range, which incorporates radius curves and invisible fix white skirting.

"We chose Interior Options because their submitted proposals met our brief accurately whilst remaining within our budget parameters.

We thank the team of Interior Options and particularly Graham and Steve, for their support on the project and achieving the deadlines agreed."
