

National Consumer Council

Site Location: London, SW1
Contract Value: £120,000

The National Consumer Council is an organisation that helps everyone get a better deal by making the consumer voice heard. Their offices are in Victoria in a beautiful Victorian building occupying 7 floors.

They needed to modernise and create a better working environment for their staff.

Interior Options have undertaken several projects, including designing and installing new daylight light fittings, new partitioning, new carpeting, redecoration of the main parts and a full electrical survey and resultant remedial works. In addition, Interior Options completed a complete refurbishment of the external elevation of the building.

" We were impressed with the professionalism used by Interior Options, as these works were carried out during office hours. The Interior Options team worked flexibly around us and we found the company very reliable with all works completed on time."

Hannaa Baulackey
HR and Facilities Officer
National Consumer Council
