

## Norwich Union (Healthcare)

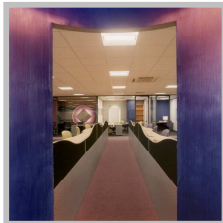

Site Location: Eastleigh, Southampton

Contract Value: £850,000

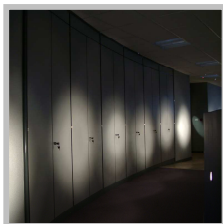

This scheme involved moving several departments out of a state of the art office environment into a much more cost effective warehouse building.

The brief included developing a working environment without natural light that the staff of this leading company would be more than happy to work in.

Working in partnership with the client over many months developing the scheme including 2D and 3D presentations, an award winning design was achieved.

The complex installation was completed on time and within the agreed budgets.
