

Shazam Entertainment Ltd

Shazam Entertainment Ltd

Site Location: Kensington, London

Project Value £32,000.00

Interior Options was awarded the contract for the fit out of Shazam Entertainment's London Head Office in Kensington High Street.

Shazam Entertainment provides a real-time song identification service for mobile phone users using patent pending software in audio pattern technology.

The relocation project was on a fast track schedule due to the expiry of Shazam's lease and the difficulty in finding suitable premises.

With a limited budget and utilizing existing equipment from their previous offices the project was completed to budget and within 4 weeks of sourcing the space. The project had the inevitable difficulties of a fit out in a Section 20 Government Building as well as requiring Landlord and Building Regulation Approvals in a very short time period.

" The project had every possibility of failing. The short schedule, inexperience of some of the personalities involved and the very real issue involved in being the first commercial tenants of a Government building were all points of failure that we had to address and the talented Interior Options team helped enormously in ensuring success.

I wish to extend my thanks and the thanks of all of us involved with this project and look forward to working with your company and the members of your team on future projects"

Jerry Roest, CEO
Shazam Entertainment Ltd.
